

Prinect Press Center

Prinect 2017 Cockpit

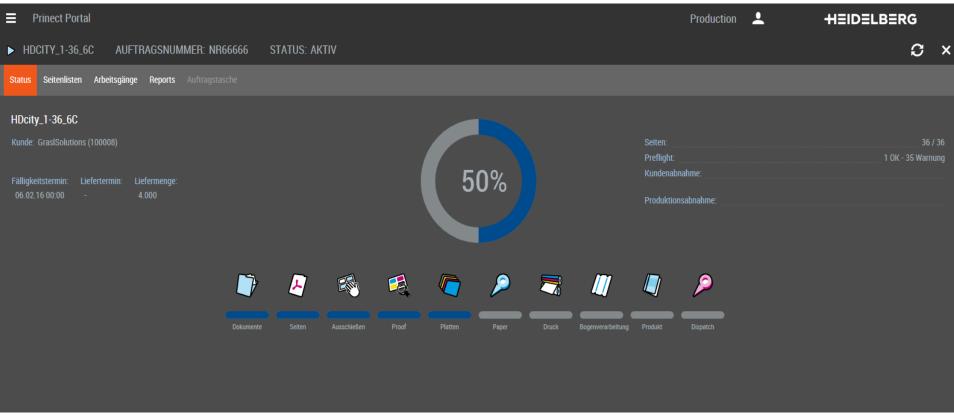

... Prinect 2017 Signa Station

+

Prinect Portal standard functionality

→ New way of status tracking and job reporting

Prinect Portal requirements:
Tablet-PC or PC with browser

What's new in Commercial Production?

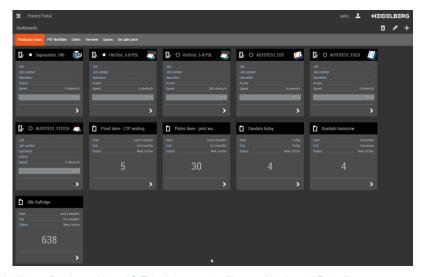

- Prinect Cockpit New Look!
- 2. Prinect Portal
 - → Standard Functionalities: Job status, Pending documents, Device Status
 - → Customer Possibilities: Prepress Portal Services, Business Portal Services
- 3. Prinect Prepress
 - → Prepress Portal Services: Files and Approvals
 - → Pending Documents (Job Maker)
 Standard functionality
 - + Smart Automation: Automation for standard products without W2P or MIS
 - → Prinect Renderer + Color Proof Pro
- 4. Prinect Press
 - → Prinect Pressroom Manager
 - → Prinect Analyze Point
- 5. Prinect Postpress
 - → Generic Postpress Interface

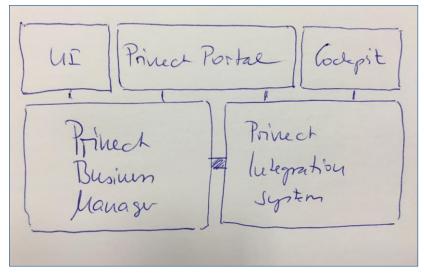

The Prinect Portal

- → ONE Portal application providing access to Prinect
 - → for Prinect Workflow and Prinect Business Manager tasks
 - → Includes features of existing Portals and Remote Access.
 - → Ready to configure role specific UI in controlling features by user rights.
 - → Driven by web technology to run in Browser on PC or Tablet.
 - → Can be installed for Prinect INT/ PBM stand alone or integrated.
- → Additional channel for Prinect interaction.
 - → NO Cockpit replacement.

Prinect Portal - browser based functionality

Just easy to use

- → Functionality provided as "widgets", eg. Pending documents, Job Status, Checkpoint...
- → Configurable, user/task specific "dashboards"

Prinect Portal **H**≣ID≣LB≣RG [Dashboards] **□** 🖋 -Production status Lieferungen PDF Workflow Test CG Portfolio Catalog Orders Overview Set sales price TestDash Macher ... Quotes Active customers Alle Aufträge Duedate today Ganging 688 211 > Suprasetter_190 [Job Maker] - Documents

Widgets arranged on user specific dashboard

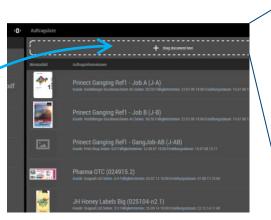

Prinect Portal - Job Maker + Smart Automation Produce standard products automatically - without W2P or MIS

- → Employees with access to the Job Maker can produce standard print jobs out of a pre-defined document pool with small training efforts
- → For production users not externals or customers.
- → Document Pool shows all incoming PDF documents to be processed.
- → Start automatic processing for standard products.
- → Offer easy solution for products that can be standardized.

Pending Documents

Job List

Job Maker

Smart Automation 2017

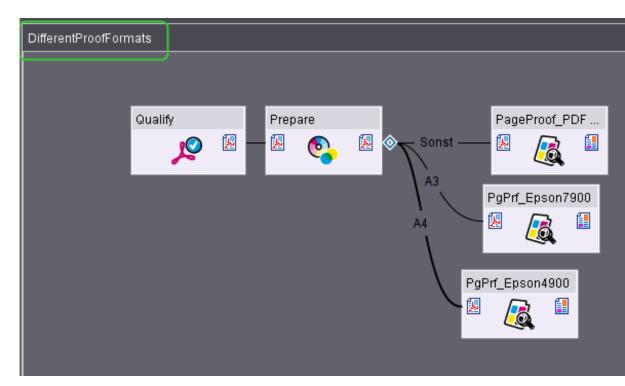

→ Improvements based on customer feedback

- → PDF Edit
- → Copy PDF
- → Possibility to combine Smart Templates and Sequences like AutoSheet/PageProof
- → Production Type from MIS 'beats' JDF entry

→ Conditional processing

→ DOCUMENT information triggers to which sequence the file is forwarded

Prinect Prepress Manager 2017

NEW: "PDF Compare" inside of Workfow

- → Input pages can be compared automatically vs. pages coming out of "Prepare"
- → Engine included in PDF Automation Pack (Trap/No Trap)

Improved handling of large PDF documents

→ More sophisticated options to check, split, and convert large PDF documents

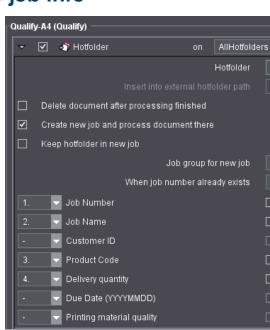

Hotfolder Workflow: More information from PDF file names fills job info

→ E.g. Delivery Quantity, Customer ID, Paper Quality, Product Code, Due Date

Preflighter Improvements

- → Overall ink coverage shown in Preflight report
- → Preflighter Profiles based on PitStop 13
- → Checking of page sizes vs. job specification

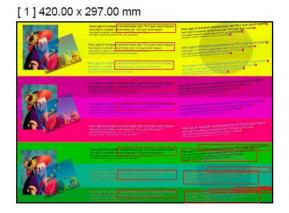

Automatic generation of sheet varnish in net size inside Workflow

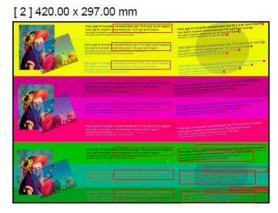

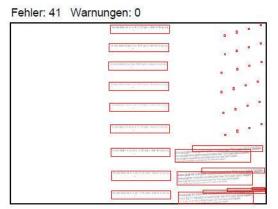

Prepress Manager & PDF Toolbox PDF Compare

- → Comparison of prepared PDF with delivered data
 - → Visual comparison shows differences
- [1] \\KIE-WF06PRDY\TestData\FrankG\Compare\Testseite_Original_ÄÖÜ.pdf 1
- [2]\\KIE-WF06PRDY\TestData\FrankG\Compare\Testseite_Edit_ÄÖÜ.pdf 1
- Auflösung: 300.0 dpi Vergleichen innerhalb: Endformat-Rahmen Mittlere Prüfungsgenauigkeit

Production security, avoid unwanted changes!

Prinect Signa Station

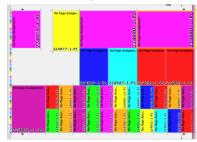

Prinect Signa Station

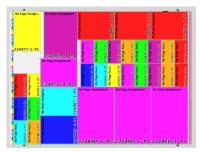

- → Several improvements based on customer feedback
 - → Ganging & MSO:
 combined for
 broader functionality
 + single user license
 available

	Folding Sheets (incl. F1, F2)	Assembly Blocks	Shapes
via Gang Pool (always with content)	Gang Job P2016		Pack MSO, Gang
Individual Job Definition (with content)		Montage MSO P2016	P2016
Individual Job Definition (without content)			P2017

→ better algorithms:

Signa 16: 750Sheets

Signa 17: 500 Sheets

+

Prinect Renderer 2017

New Adobe PDF Print Engine 4

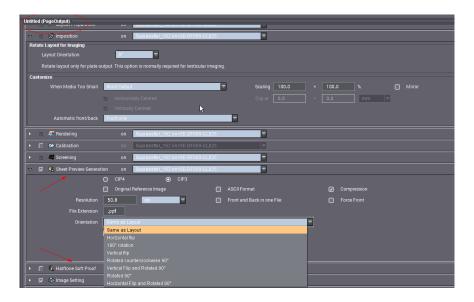

→ Most recent Adobe Technology, including all bug fixes and enhancements

New sequence type: "Page Output"

→ Enables e.g. to output sheets imposed by other systems (InDesign and others)

Higher resolution for PDF Export: 1200 dpi

→ before: 720 dpi

\mathbf{H}

Prinect Data Center - Archiver Pro ...

... the perfect extension to the basic archiving functions of Prinect.

- → Archives of any kind of content data or assets together with the related print job
- → Browser based GUI to navigate through, find and view data for quick and easy re-use

Its content data management capabilities make it the ideal replacement of Prinect Content System

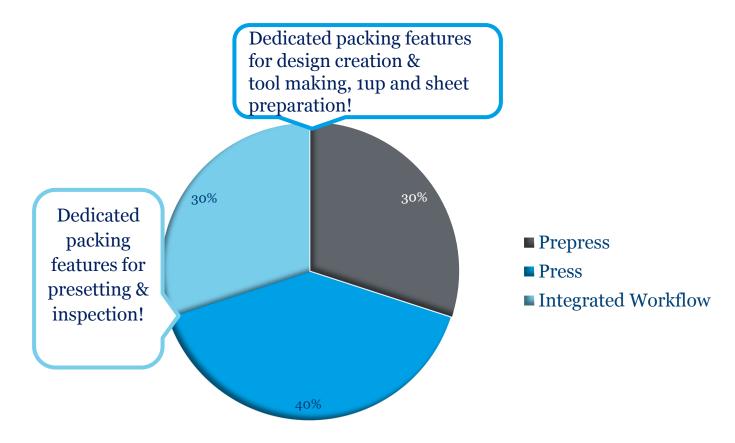

Prinect Data Center - Archiver Pro Function Overview And Comparison

H

More than 1300 packaging printers use a Prinect Workflow

- → Approx. 30% have an integrated workflow –combining prepress, press, and often postpress
- → Integration share is growing rapidly!

- 1. Automated structural design & exact estimation data
- 2. New features in Package Designer
- 3. New features in PDF Toolbox and Prepress Manager
- 4. New features in Signa Station Packaging Pro
- 5. Quality reports in Analyze Point

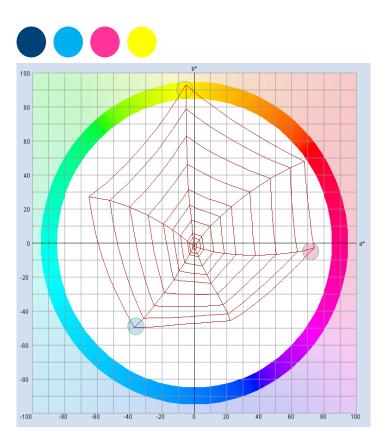

\blacksquare

New features for cut & stack labels for sheetfed workflow

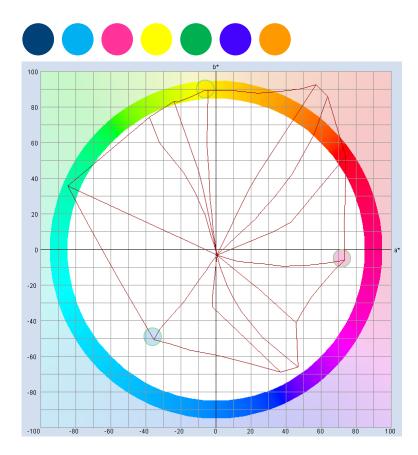

- → Automation with Business Manager:
 - → One-up preparation and approval
 - → Autoganging
- → Signa Station:
 - → Ganging / Sheetoptimizer (combined in 1 license)
 - → Define overproduction per article
 - \rightarrow Load shape(s) in input list
 - → Packaging & Montage mode:
 - → Special marks for precutting
- → Advantages:
 - → Highly automated label workflow to
 - → Save time & production costs
 - → Ensure stable, high quality

Prinect Web Shop

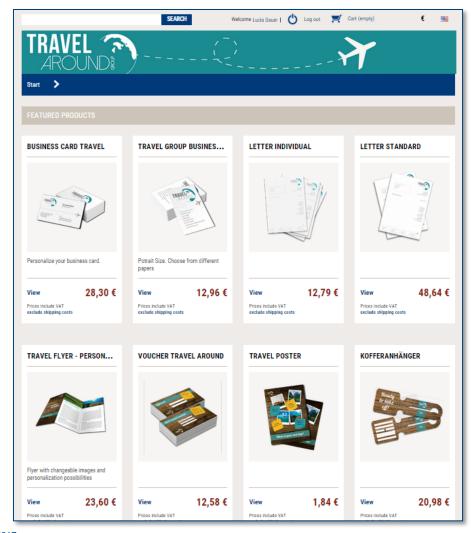

Entry level web shop

- → For the immediate start
- → For standard products and processes
- → Range of features "out of the box"
- → B-to-C or B-to-B business (open shop or closed Shop)
- → Integration into Prinect workflow

Advantage for the printing house:

- → Automate order management and production
 - → small orders in price and run length pay off
 - → New customers are attracted

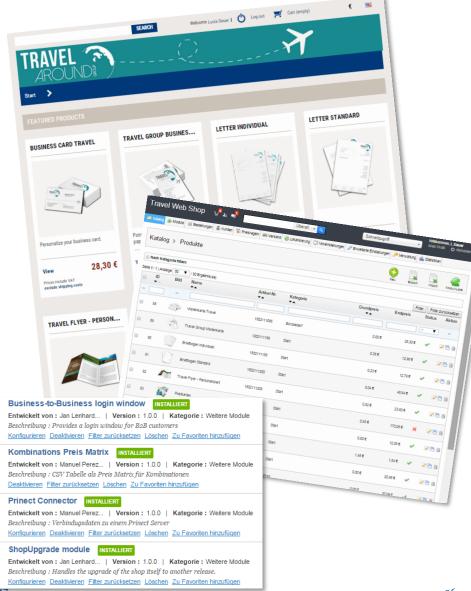

Prinect Web Shop – Main Aspects

- → SaaS-Set up
 - → Hosted by Heidelberg
 - → Editor, InDesign Server connection
 - → Browser-based, frontend + backend

- → Basic E-Commerce shop Open Source Specific Web-to-Print Modules for print products programmed for Heidelberg
- → Integration into Prinect through
 Web-to-Print Connector to Prinect

Let's go into the pressroom

- → Clear display of all available job and presetting data
- → Prinect provides the best information package for the press operator
- → Full scope of job and presetting data only available with Prinect

Prinect Pressroom Manager: the DFE for Speedmaster offset presses

New Wallscreen XL job list

Enhanced job list parameters for selection:

- → Queue status
- → Pull lay
- → Paper
 - → Name
 - → Dimensions
 - → Grammage
 - → Grain direction
- \rightarrow Inking (4/4)
- → Color sequence
- → Article No.

Full Prinect integration delivers...

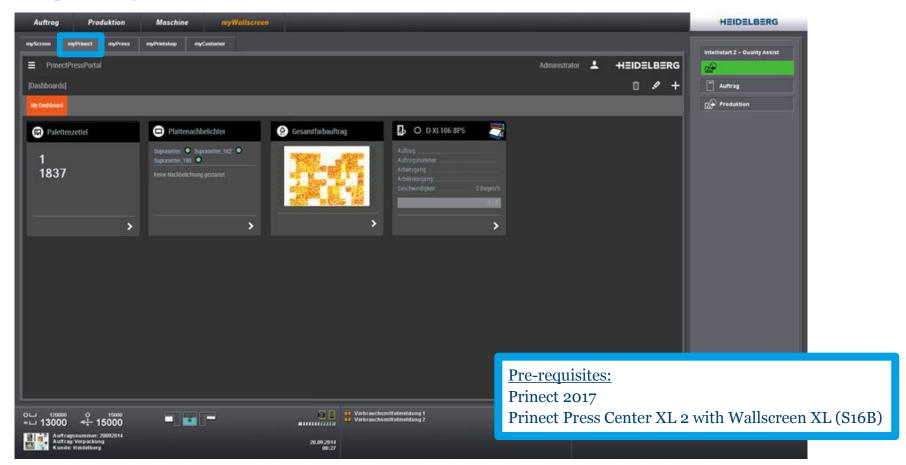

.... all these parameters!

.... best support for the press operator!

+

Wallscreen XL with myPrinect

- → Prinect Widgets provide the direct access to Prinect
- → Operator gets new tailor-made convenience and comfort functions

+

The Prinect Widgets at Wallscreen XL

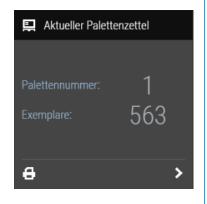

Status

→ Displays activity of started job

Pallet sheet

- → Displays pallet number and amount sheets on the pallet
- → Allows print out

Overprint

→ Displays total ink coverage

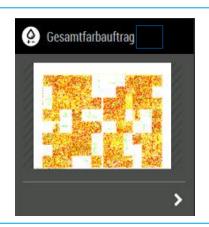

Plate on demand

→ Displays actual amount of requested plates in progress

Prinect Image Control 3

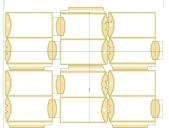

- Using proofs to adapt the print
- Replacing the traditional print control strip by distributed print control elements allow for enormous savings of cardboard
- CMYK and PMS solid colors are detected automatically and ensure the highest uniformity of corporate colors and multiple ups

- First system in the world that can control Opaque White
- Offline Inspection for faultless prints without additional measurement. (April 17)

Data Terminal – Job selection by folding sheet number

→ Goal

→ Easy and error free finding and starting of folding operations

→ Function

→ Print a barcode on each folding sheet and scan it at Data Terminal

→ Implementation

- → Each Folding sheet has a system unique identification
- → Placement of the new barcode mark on the printing sheet during impositioning (with integrated Signa Station), Prefix "F\$" eg. F\$00001000001
- → Scan the barcode at folding device

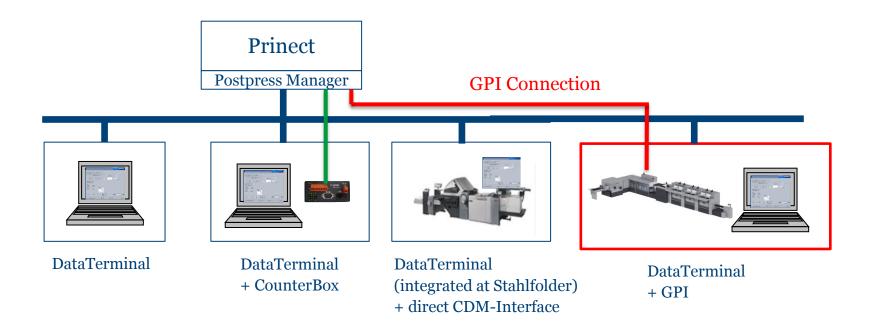

+

Generic Postpress Interface (GPI)

Implementation

- → DataTerminal as GUI for Prinect functions
 - → Login/logout user
 - → Start/stop job, report material consumption etc.
- → Add new connection type "GPI"

Market situation of Prinect Business Manager

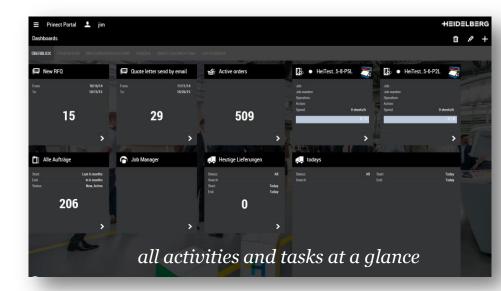

- More than 70 installations worldwide (+ 250 Cerm inst.)
- Large customers are buying / starting to buy
- Big interest of "mixed" customers in PBM
- First base projects successfully executed!
- Portals and Speed Estimators more and more accepted by customers

© Heidelberger Druckmaschinen AG

Prinect Portal – the new browser-based tool to handle and manage print orders

- → New browser-based tool for all
- → workflow steps:
 - → Request for Quote, ordering, stock withdrawal, job tracking
 - → Create quote and estimate
 - → Approval workflow of content layout
 - → View detailed production status
 - → Get delivery, invoice and analysis
 - → Keep customer and project overview

Roles and rights control for all functions

→ Print Buyer, Sales Rep, Order Manager, Production Operator, other

Dedicated portal solutions for all users

Prinect Portal

Print buyer

Demands:

- Online RFQ
- Receive online quote
- Online ordering
- Upload and approval workflow
- · Stock withdrawal
- Tracking

Sales Rep

Demands:

- Customer overview
- Project overview
- Online RFQ + automatic estimating
- Online quote
- Online ordering

Order Manager

- Project overview
- Task lists
- Automatic estimating
- Determine sales price
- Create quote
- Create order
- Ship produced orders

Production Manager

Demands:

- Job overview
- Set status
- Production tracking
- Upload and approval workflow
- Production reports

+

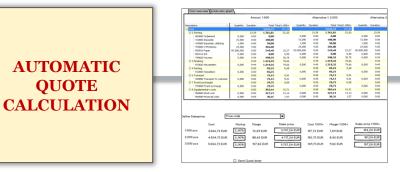

Fully automatic quote calculation

- → Speed estimator overcomes manual estimation efforts and feed portals with automatically calculated costs / sales price
- → Browser-based RFQ screens for print shop employees and print buyer

→ Automatic calculation of all possible production paths and automatic selection of the cheapest way to production

Check cost & sales price

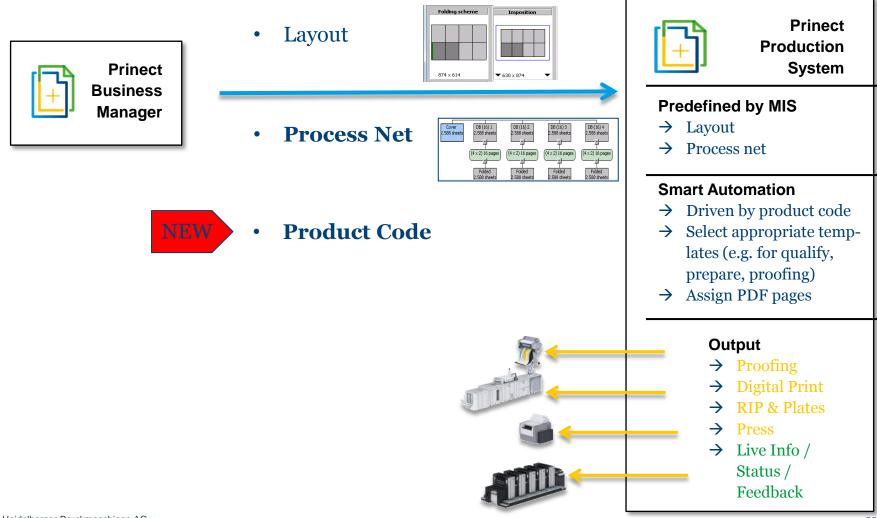

Send quote letter

→ Efforts for quote creation of standard products reduced by up to 90 %

Best of 2 worlds: Combine product pre-definition in MIS with Smart Automation (driven by product code)

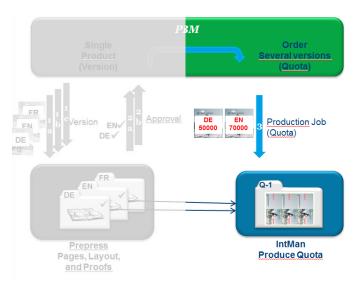

Integrated Workflow for Quota Jobs

- → PBM: Plan specific sales order
 - → Specific versions with specific amounts to be delivered
 - → Create production job with Paper and machines
 - → E.g. Bikes 50000 German, 100000 English

\rightarrow INT:

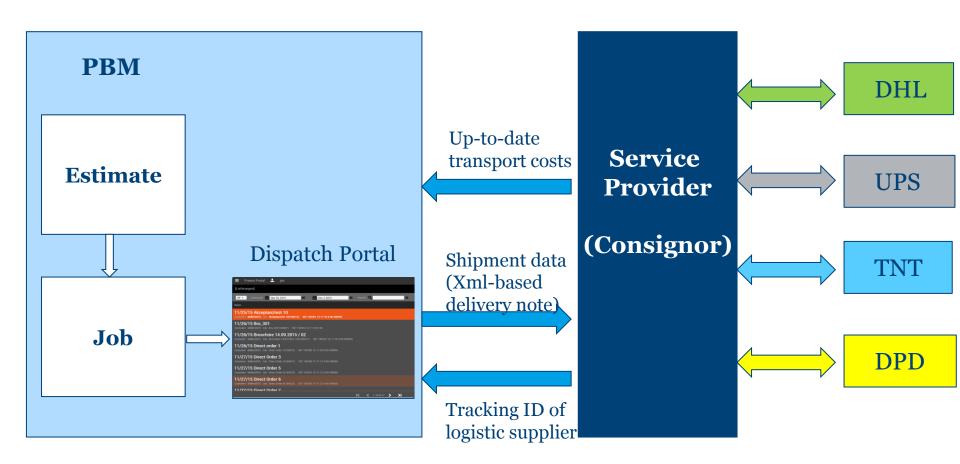

- → Take over production job
- → Autocreate Layout
- → Get approved pages from product jobs
 - → Remember Source
 - → Warn for changed source pages
- → Do production of job (plates, print, ...)

Dispatch Portal and Logistic Interface

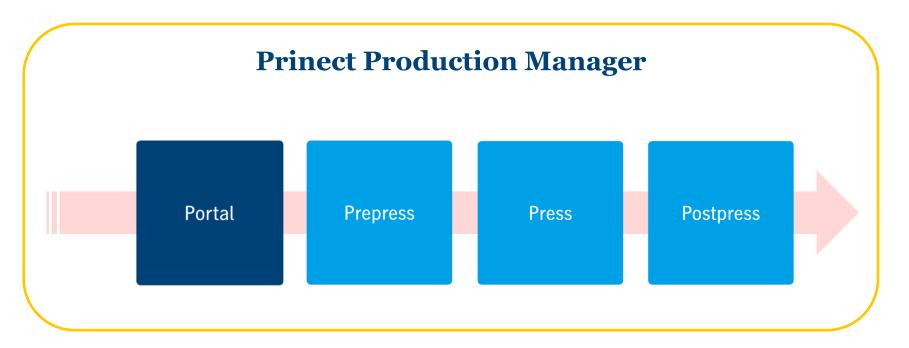

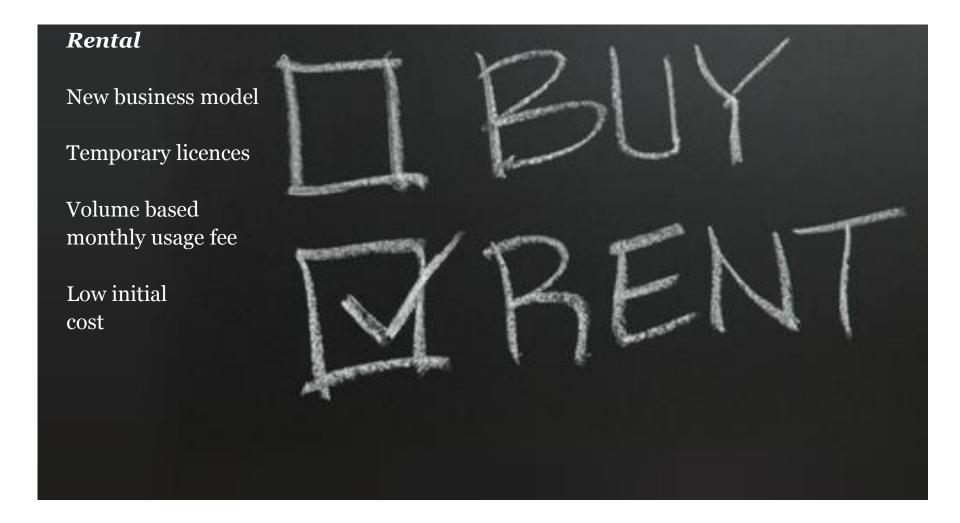

Significant savings by online transfer of shipment data to logistic suppliers

Includes the complete Prinect Production Workflow for Digital, Prepress, Press and Postpress, with all Integration and Automation features, for Commercial and Packaging

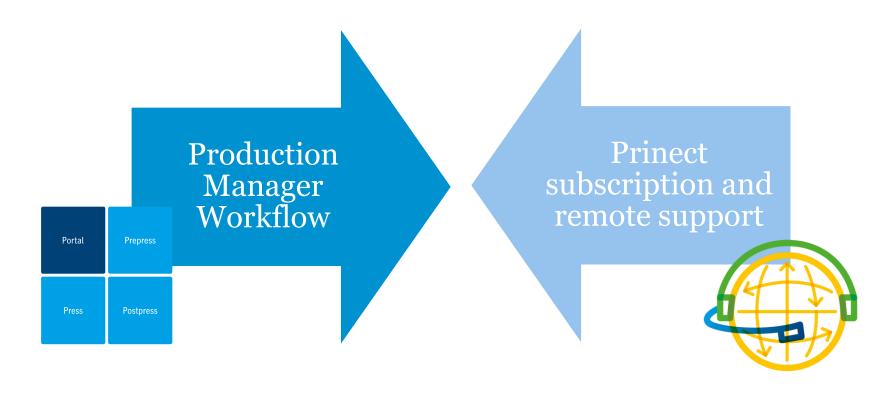

Prinect software subscription, hotline and remote support included in the monthly fee

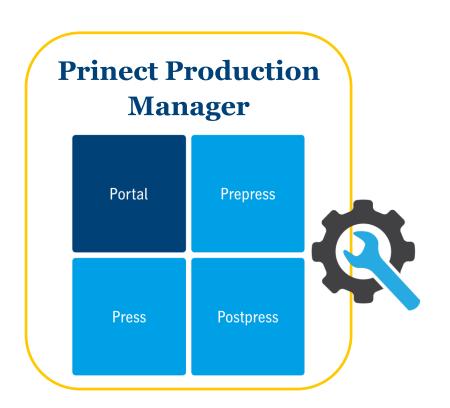

The Production Manager fee follows your business

- → Base fee + volume based fee
- → Volume based fee depending on generated sqm TIFF per month

Easy calculation:
Base fee + generated sqm TIFF x
price for TIFF
= monthly usage fee for Prinect
Production Manager

Configurations can be extended at any time, without any increase of the monthly usage fee

Extension of Production Manager workflow requires training module

First UK customer for Prinect Production Manager

Jones & Brooks becomes the first UK company to sign up for Heidelberg's 'pay as you go' volume-based pricing Prinect Production Manager workflow.

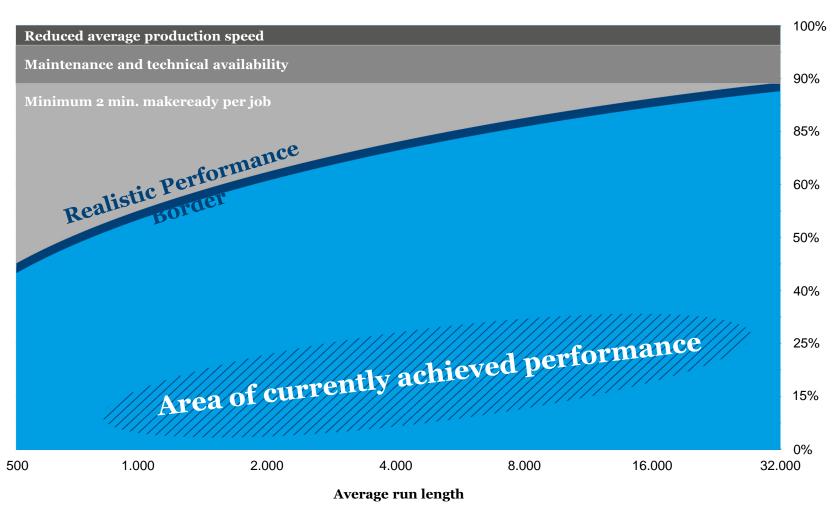

Jones & Brooks managing director Ronnie Blair said: "It protects us because we're not paying out a lot of money if we haven't got a lot of work for the machine. As we build up the volume of work then obviously we'll pay more, which we think is a good way of doing it. Heidelberg configures the workflow to our specific needs and we can adapt the configuration or add other workflow modules if we need to. This will enhance our file preparation for work across the different technologies we have here."

Ouotes: Print Week

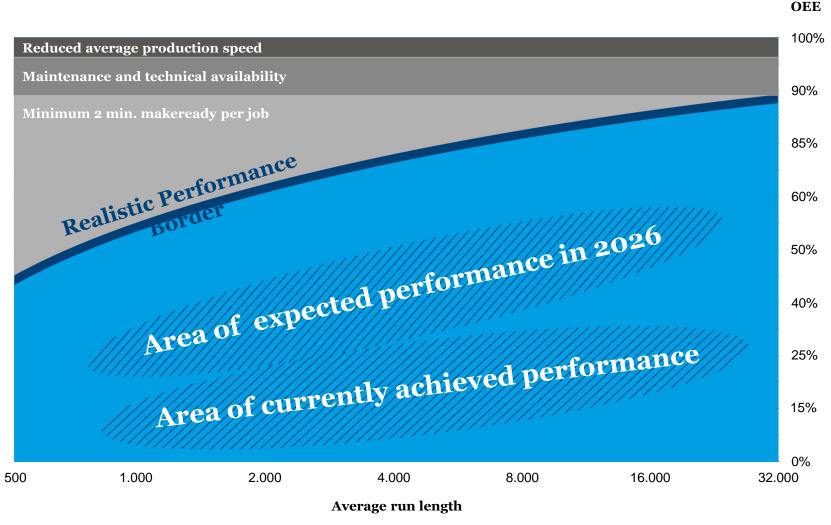

OEE

Operational excellence. Overall Equipment Effectiveness (OEE) today is at ~25%

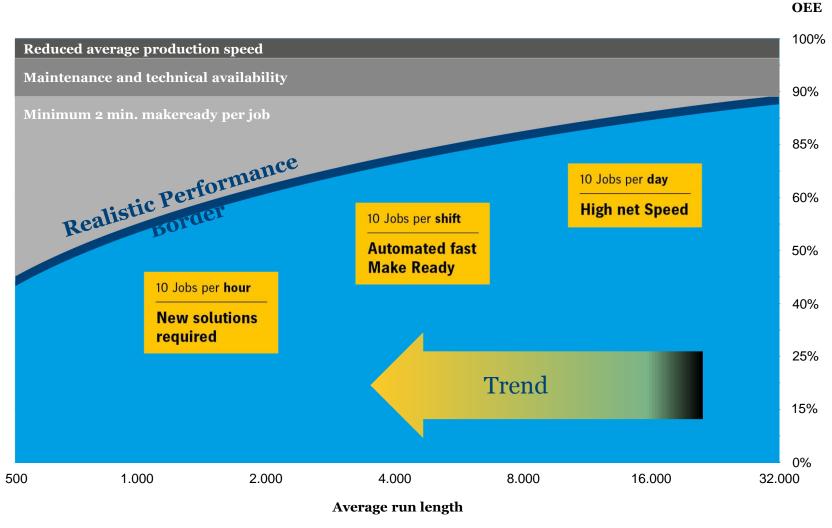

Operational excellence. The average OEE will double within the next 10 years to 50%.

Operational excellence. The average OEE will double within the next 10 years to 50%.

Major challenges on Reporting

To provide a consistent, uniform solution for the most effective resource usage, we have to:

- (1) Combine the financial and productivity / quality data.
- (2) Provide consistency of Key Performance Indicator (KPI) information given in Heidelberg applications.
- (3) Extend KPI information and integrate Benchmarking features.
- (4) Provide multisite analysis features.
- (5) Provide a state-of-the-art Bussines Intelligence application.
 - Intuitive | Mobile | Drilldown | Email | Export | ...

"Prinect BI"

\blacksquare

Requirements for a Business Intelligence (BI) solution

- Users, security, access rights, ...
- Translation of the reports
- Versioning (data warehouse, standard reports)
- Export to Excel
- Customization on a copy of the standard report
 This allows update/improvement of our standards
- Allow the build of new custom reports from scratch
- Integration of the reports in PBM and on the Prinect portal
- Third party data integration (other databases, customer excel files)
- Email driven reports
- •

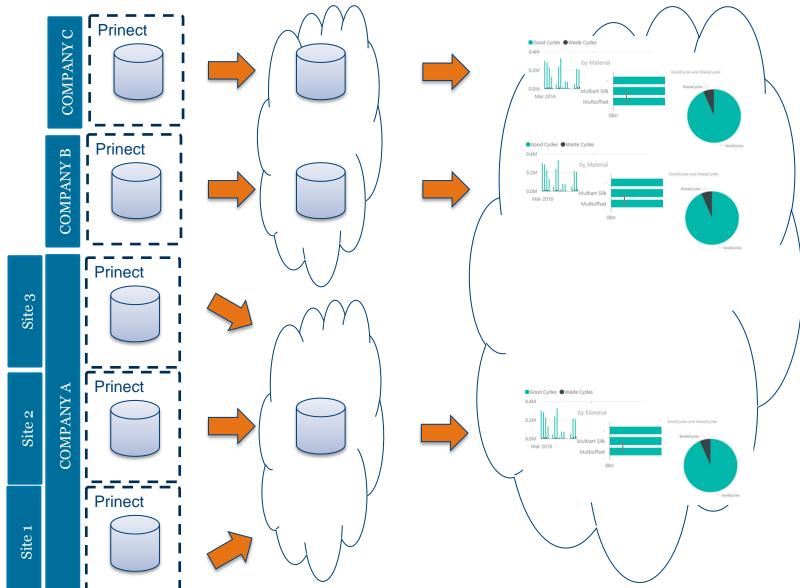

Prinect BI

+

General structure

Prinect BI will...

- \rightarrow be a new, cloud based product.
- → be planned to get available via HD Assistant and Prinect Portal
- → focus on analyze processes, devices, jobs, operators to guide customers
- → not provide real time tracking and status information
- → not replace Analyze Point
- → Prototype ready for first customers in early summer 2017
