LET'S INTERNATIONAL PRINECT USER DAYS

Digital scheduling without MIS connection: Prinect Scheduler provides nice advantages.

H

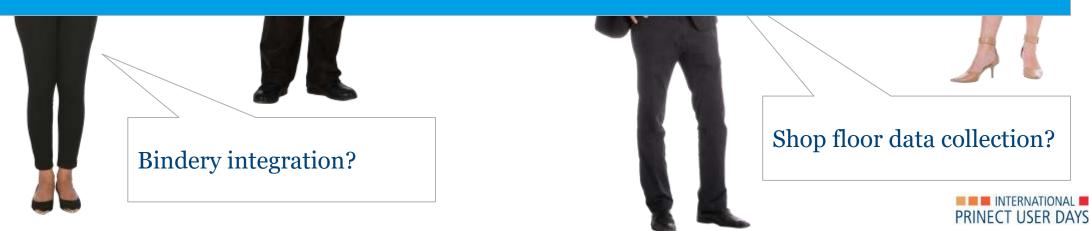

Agenda

Target goal and pre-requisites.
Job preparation and scheduling.
Make ready optimization.
Warnings and alarms.
Special views and functions.

Prinect Scheduler – Step towards Smart Print Shop

How is scheduling done in your print shop today?

+

- \rightarrow Daily or weekly?
- \rightarrow 1x, 2x, 3x daily or as needed?
- \rightarrow Which tools are used (Excel, others)?
- \rightarrow At which stage of the job processs do you schedule?
- \rightarrow Is there a rough and a fine planning?
- \rightarrow Manual time scheduling, forward or backward planning?
- \rightarrow How does the planning of periodic jobs and maintenance work?
- \rightarrow How is the schedule announced to the employee?
- → Who is responsible for the production right in time (Calculation, sales, production manager, planner...)?
- \rightarrow How many people are involved in time scheduling?
- \rightarrow What should be planned?

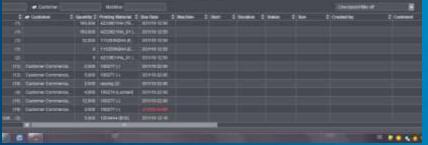

Prinect Production Manager with integrated Prinect Scheduler opens up many possibilities and provides nice advantages.

Scheduling without MIS integration. What could it provide for your print shop?

- → Scheduled operations directly available for the press operator (presses connected online or with Data Terminal).
- \rightarrow Always up-to-date information from connected devices.
- → Capacity overview in Prinect Scheduler and/or Prinect Portal.
- \rightarrow More job information at the press
 - \rightarrow Quantities
 - \rightarrow Calculated production times
- → Better overview and organisation of materials
 - \rightarrow Paper
 - \rightarrow Spot colors
 - \rightarrow Plates

Only a view clicks more in prepress.

Optimal job preparation

Planning Assistant guides through the planning process to keep the entire production process as smooth as possible.

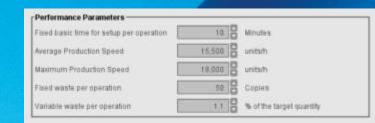

PRINECT USER DAYS

Performance data configuration

- \rightarrow Basic make ready time
- \rightarrow Average speed
- \rightarrow Max. speed
- \rightarrow Waste sheets per operation (fix)
- \rightarrow Variable waste sheets per operation

Provides automatic calculation of Total duration Make ready time Production time

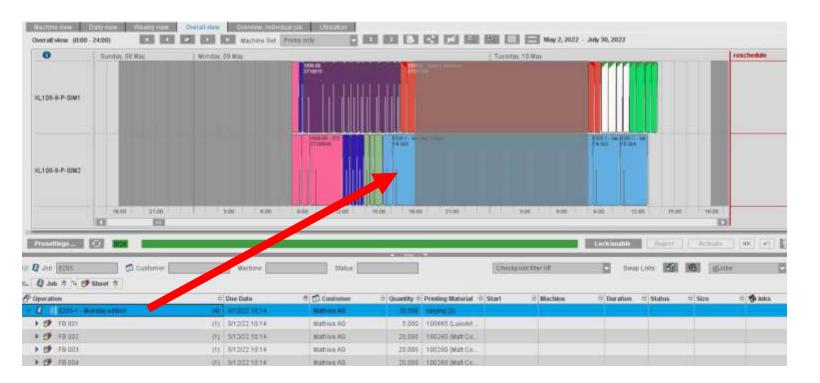

Scheduling.

Schedule by Drag & Drop

Select job in the job list and place it by Drag & Drop at the desired time in the planning board.

Forward Scheduling

Select job in the job list and use "forward scheduling" in the menu. System will automatically schedule the job to earliest possible starting date and earliest finishing date.

Make ready optimization.

Warnings and alarms.

Prinect Scheduler indentifies conflicts before they harm your business.

- \rightarrow Delivery date / time is exceeded
- \rightarrow Process steps are partly or completely outside of a shift
- → Once postpress planning gets included: Overlapping processes (start of a process step is earlier then the scheduled end of the predecessor process

\rightarrow Checkpoints are not fulfilled in time (i.e. paper or plates are missing)
