

WS 08, WS 10 & WS 20
**Optimized job sequence,
new planning logic
in the Smart Print Shop.**

A decorative graphic on the left side of the slide, featuring a cluster of white gears of various sizes. Inside the gears are various icons: a flowchart with three steps, a speedometer, a speech bubble with a question mark and an exclamation mark, a Wi-Fi symbol, a bar chart, a Euro symbol, a shopping cart, a globe with binary code, and a bar chart with an upward arrow. At the bottom left, there is a large white stylized letter 'B' with horizontal bars.

Optimized planning sequence.

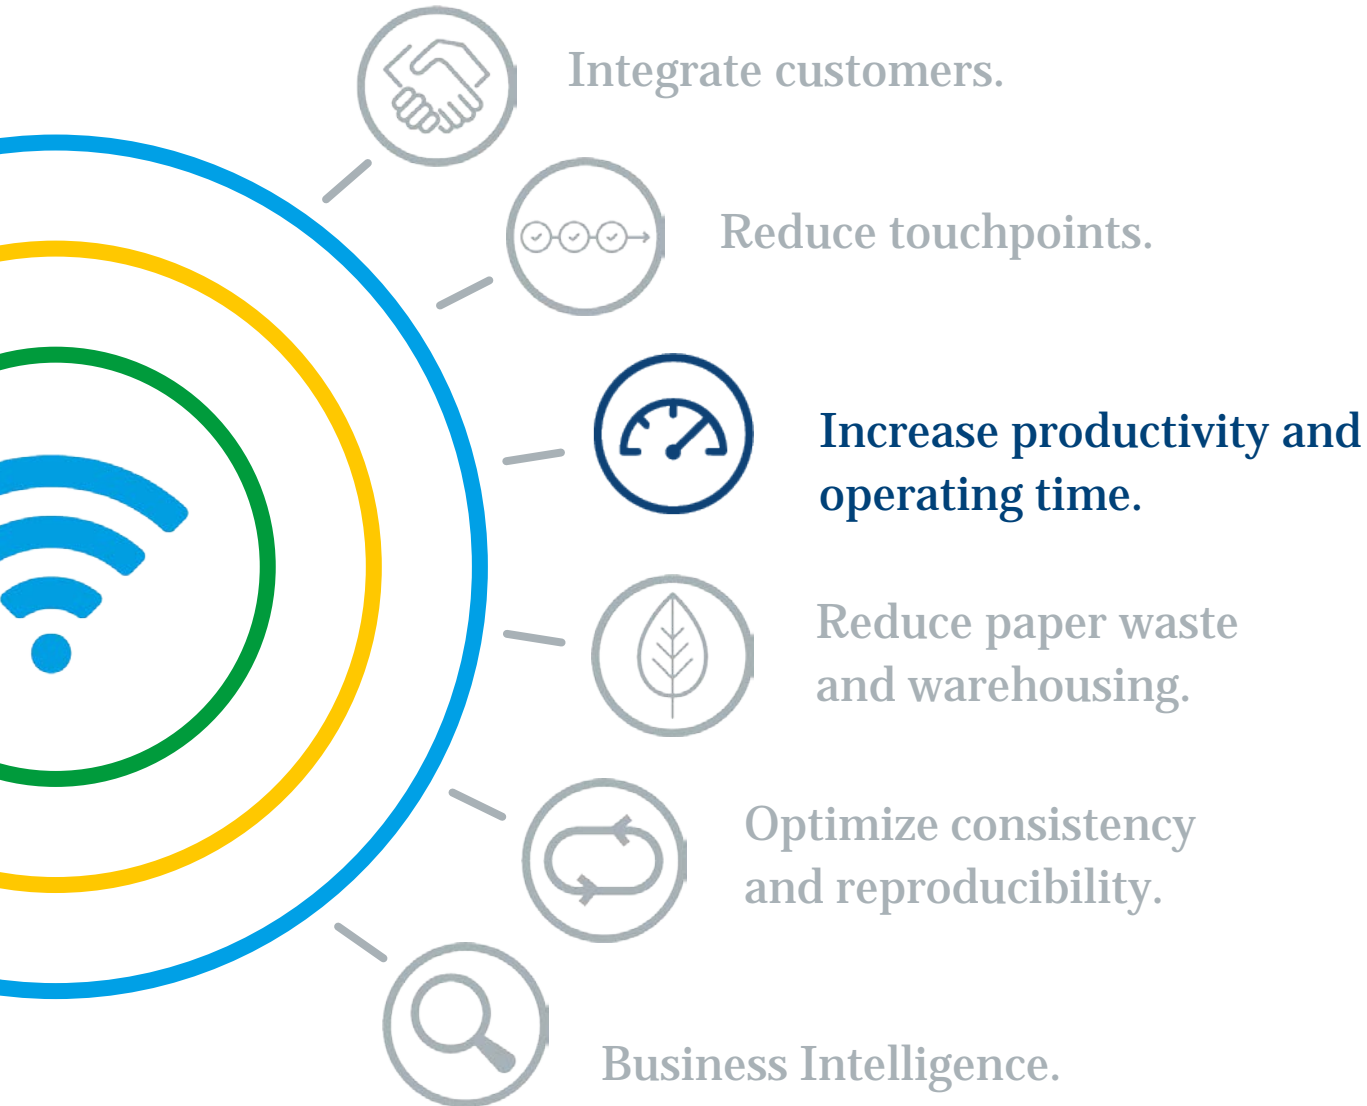

A new way of printing.

How does Prinect Scheduler work?
Which optimization possibilities are offered?
Always keeping the overview?

WORKSHOP

08

How do you schedule? What are the planning criteria?

Scheduling.

Reduce make ready times to a minimum in order to achieve constantly high performance and quality.
And having transparency in all areas.

Goals

- Maximum performance
- Reduce times for job changes
- Knowing where time gets lost
 - Make ready time
 - Waiting for information
 - Changes of substrates and consumables
 - Miscellaneous times

Push to Stop philosophy in all areas

- Less waste
- Better performance
- Higher margin

Put old routines into question.

Forget "old" scheduling procedures

- Scheduling in accordance with availability
- Scheduling by machine operator
- Fastest throughput time
- Finalization at delivery date
- Manual changes on the the job bag

Avoid continuous change overs at the press

- Consider the scheduling hierarchy
 - Paper dimension
 - Grammage
 - Ink coverage
 - Folding scheme
 - Delivery date

Interlinked dependencies.
