Reduce paper waste and warehousing.

Optimizing consistency and reproducibility.

Business Intelligence.

Integrate customers.

Reduce Touchpoints.

Increase productivity and operating time.

Reduce paper waste and warehousing.

Optimizing consistency and reproducibility.

Business Intelligence.

What's new in our integrated Portal / MIS solution:
Get it fast and easy from Request for Quote
to delivery - with Prinect Portal.

Estimating – much more than just finding the right price:

→ Just a few clicks to define the desired product in the Prinect portal

→ Automatic estimating: finds cheapest production path

→ Predefines all production steps
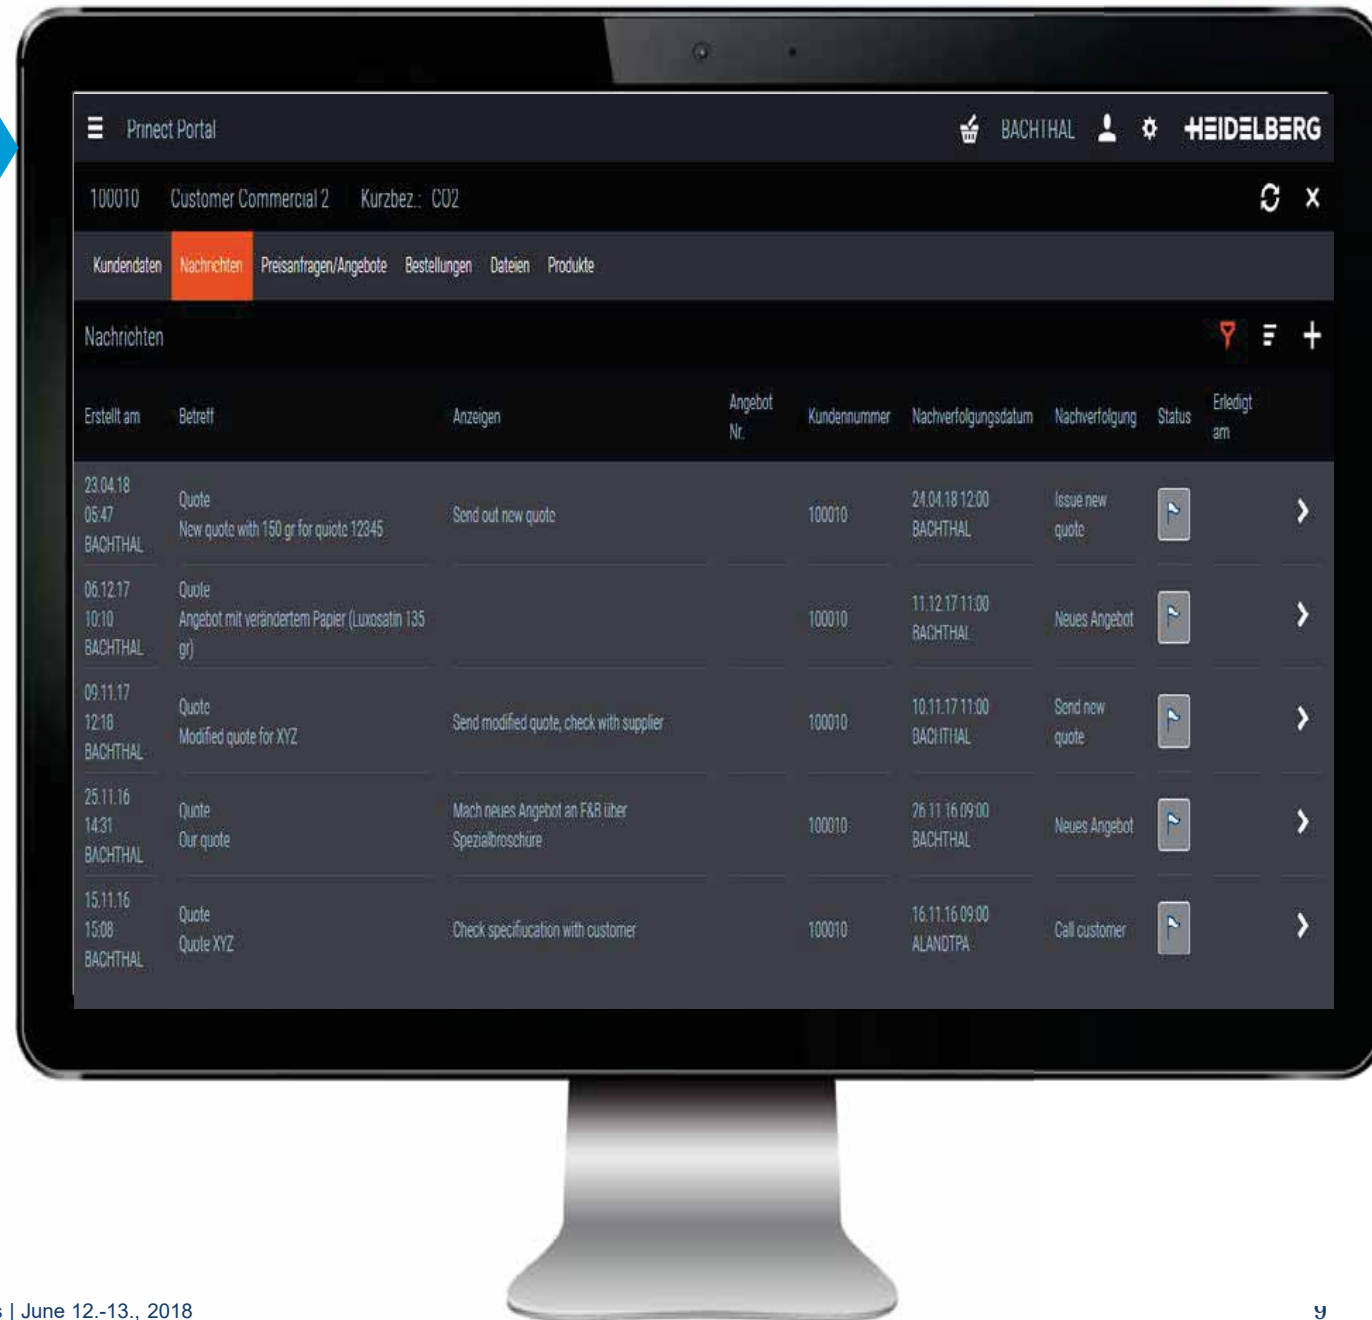

Automatic quote generation via Prinect Portal.

NEW:

→ Selection of the packing

→ Selection of transport options/costs

→ Additional standard processes in Prepress and Postpress can be configured

Up to 90% reduction of the efforts for quote generation

LIVE DEMO
Prinect Portal.
New structure and extension of the MIS functionality.

→ **Messaging** module of Prinect Business Managers now also available in the Portal
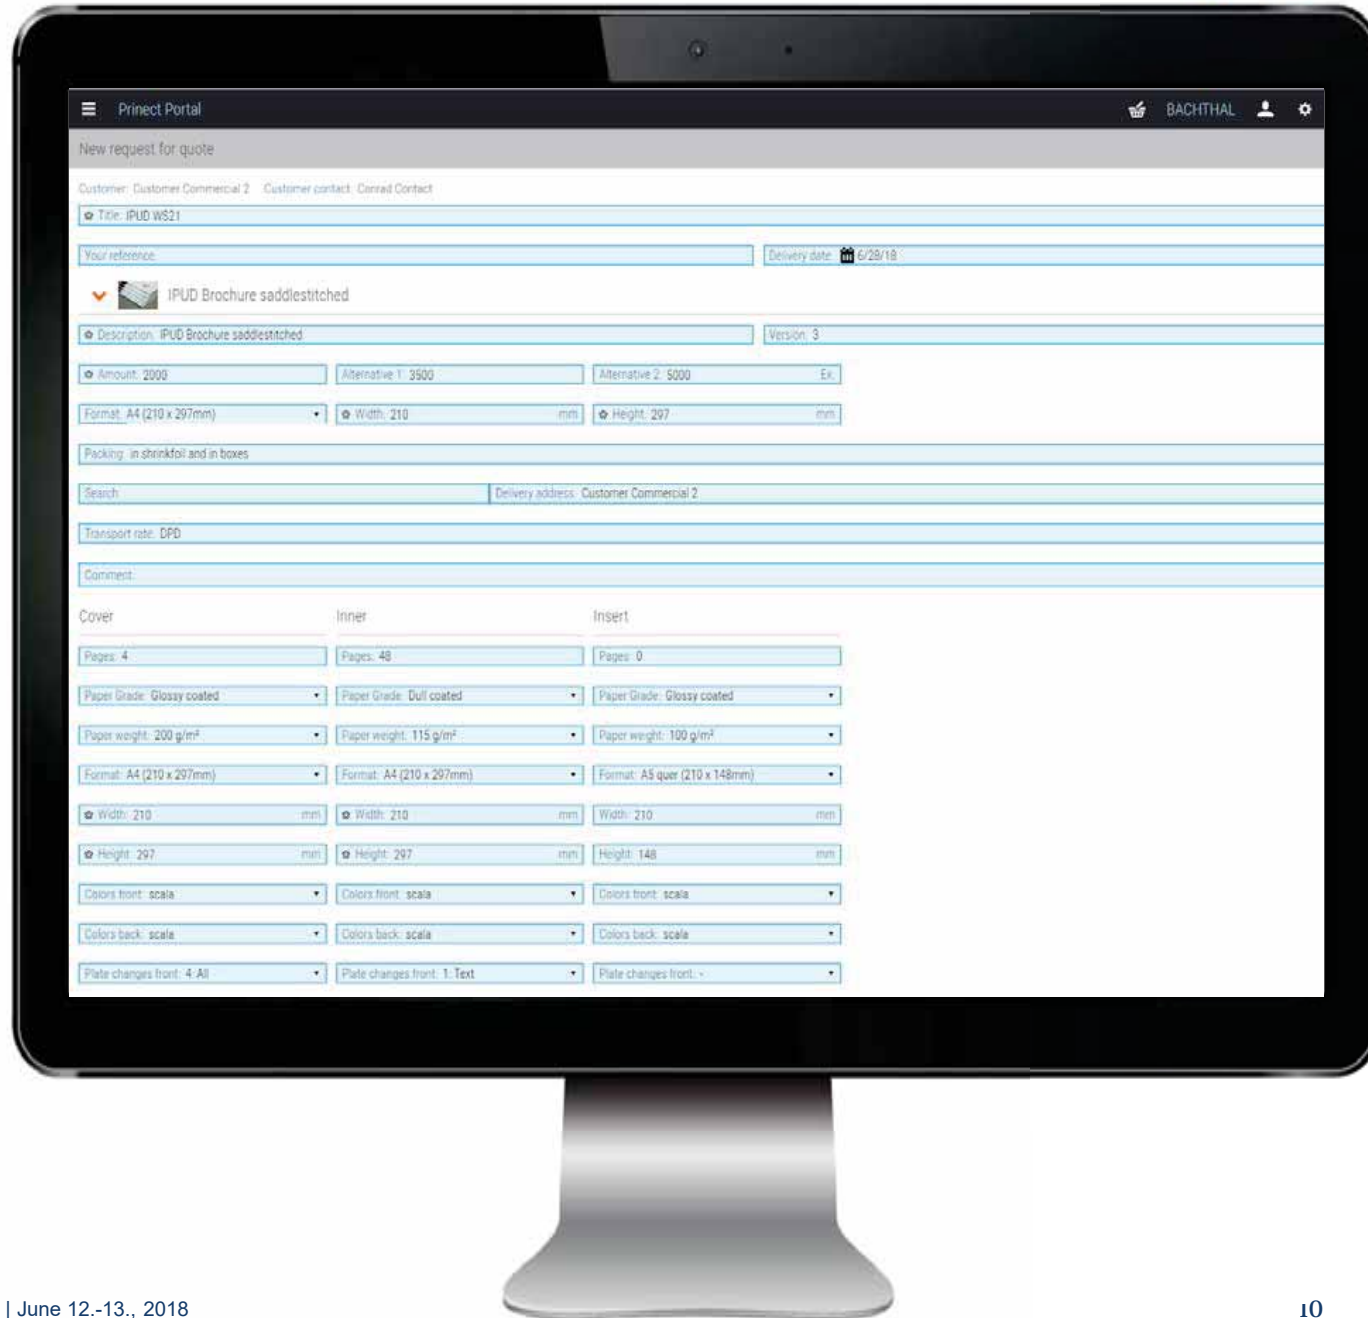

→ **Easy creation and follow up of internal processes**

LIVE DEMO
Prinect Portal.
Extension of the
MIS functionality.

→ Use of prefined products

→ Extended product type
   predefinition

→ Creating quote
   variations

→ Order with multiple
   deliveries

→ How to use Prinect
   Portal for printbuyer

Prinect Portal.

Extended information on available production capacity.

Prinect Portal.
Free definable widgets.

→ Show any (3rd party) info directly in Prinect Portal

→ Programing (by user) via REST interface

→ Support of displaying pictures, lists as well as various diagrams

Higher flexibility by specific adaption of the Portal

Complete Integration.
Business & Production workflow.

→ Online order and data upload
   in the portal

→ Automatic job creation in MIS and
   production

→ Automatic predefinition, optimization
   and start of the production

Extended integration between Prinect Business Manager and Prinect production workflow
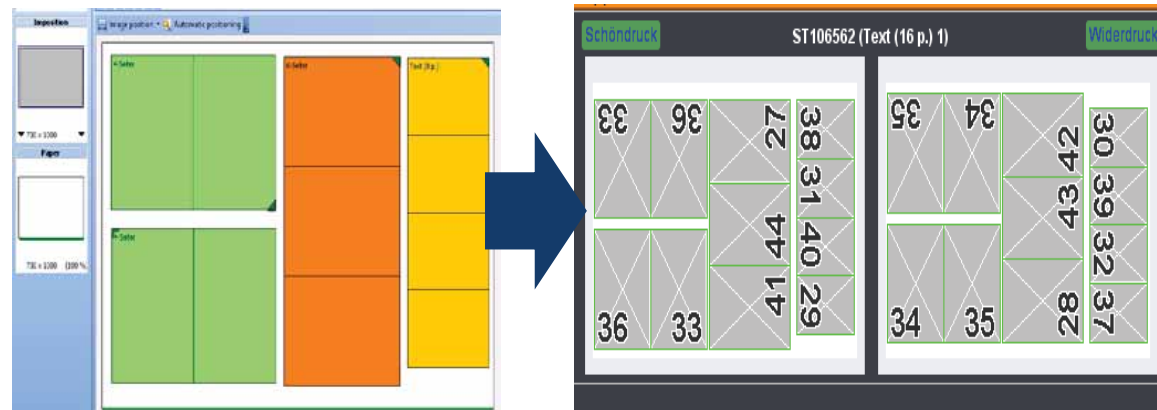

Extended Integration of Prinect Business Manager with Prinect production workflow

- Full predefinition of folding sheet orientation in MIS (and transfer to production)

- Gang form: Define exact position for each element in MIS and send it to Signa Station

MIS   Production
