Forms Survey
It's time to hear from you!

...May we introduce? Power Press!

The Company

- Mixed Commercial Print Shop with prepress, print & postpress
- 18 Employees, 2 Shifts
- Mostly regional customers:
 - Industrial clients
 - Retailers, local sports clubs (B2B)
- Strategy:
 - Expand online offerings as an additional sales channel
 - Differentiation: Service & consulting compared to online printers

3rd Party

...May we introduce? Power Press!

Pain Points & Requirements.

Data quality

- About two-thirds of customer files need corrections
- Corrections are not billed > time efficient solutions required

Structure & Organization

- Despite small company size: Clear planning, transparency & structure
- Capturing, analyzing & using production and operational data is essential

Flexibility in production

- Combination of offset & digital printing
- Decisions based not only on quantity/cost but also deadlines & pre-/post-runs
- Hybrid production offers great advantages but makes production planning more complicated

The Power Press Team

Ben
Customer Service
Representative

Alice
Prepress Operator

Rachel
Production Planning

Paul
Press Operator

Agenda

1. Problems with customer files | *Convert 3c text to K*
2. Process Stability in Printing | *Ink pickup bars in non-print areas*
3. Efficient Imposition | *Dynamic Product Templates*
4. Production Planning | *Hybrid Production Digital – Offset*
5. Repeat Orders | *Copy, Take over, Template*
6. Maintain the overview | *Job Filter by Order Status*

Print Data Issue | Converting 3c text to K

Alice has a Print Data Issue. Converting 3c text to K.

Situation

- Tight deadline – Customer needs fast delivery
- Preflight-Alarm: Text separated in 3c
- Risk: Misregistration during press run, unnecessary complexity

Prinect Solution

- Automatic conversion from 3c in K
- Part of Preflights in Qualify & Prepare – clean data, less prone to errors
- Saves time, job meets due date

The screenshot shows the Prinect software interface with the 'Preflight' tab selected. The 'Preflight Settings' section lists several warnings related to color management and device profiles. A blue box highlights the first two items in the list:

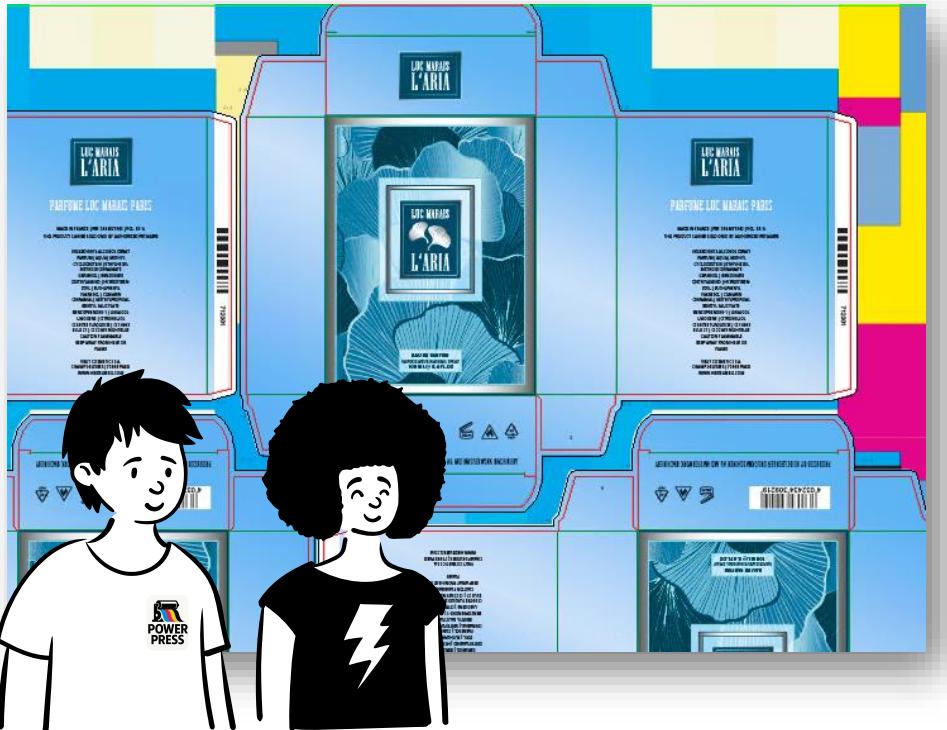

- Warning: Contains colored gray (R=G=B or C=M=Y, K=0)
- Warning: Contains 4-color CMYK black

To the right of the list, there are two checkboxes:

- Turn Colored Gray into Gray
- Turn 4-color CMYK Black into K

Process Stability in Printing | Ink pickup bars in non-print areas

More Stability for Paul – Thanks to smart positioning Ink pickup bars in non-print areas.

Situation

- Tight deadline, Sheet size ordered to the millimeter
- No space left for ink pickup bar – Cardboard is expensive.
- Risk: Color deviations during press run

Prinect Solution

- (Flexible) Positioning of ink pickup bars in non-print areas – also ink zone related possible
- Straight forward in Prinect Signa Station – no additional effort
- Benefits: More color consistency, less make ready sheets, consistent print quality

Dynamic Product Templates

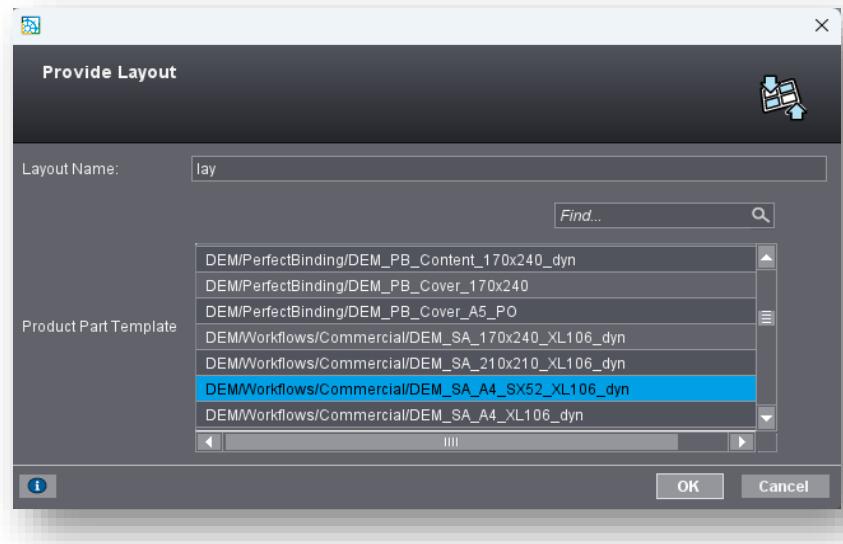

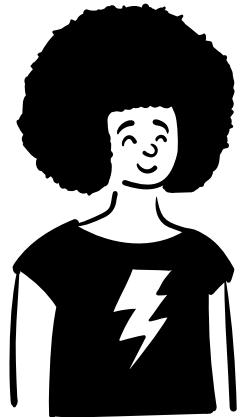

Efficient imposition – Alice does it dynamically. Dynamic Product Templates.

Situation

- Imposition requires multiple manual steps
- Various templates for every use case
- Time consuming and risk for errors

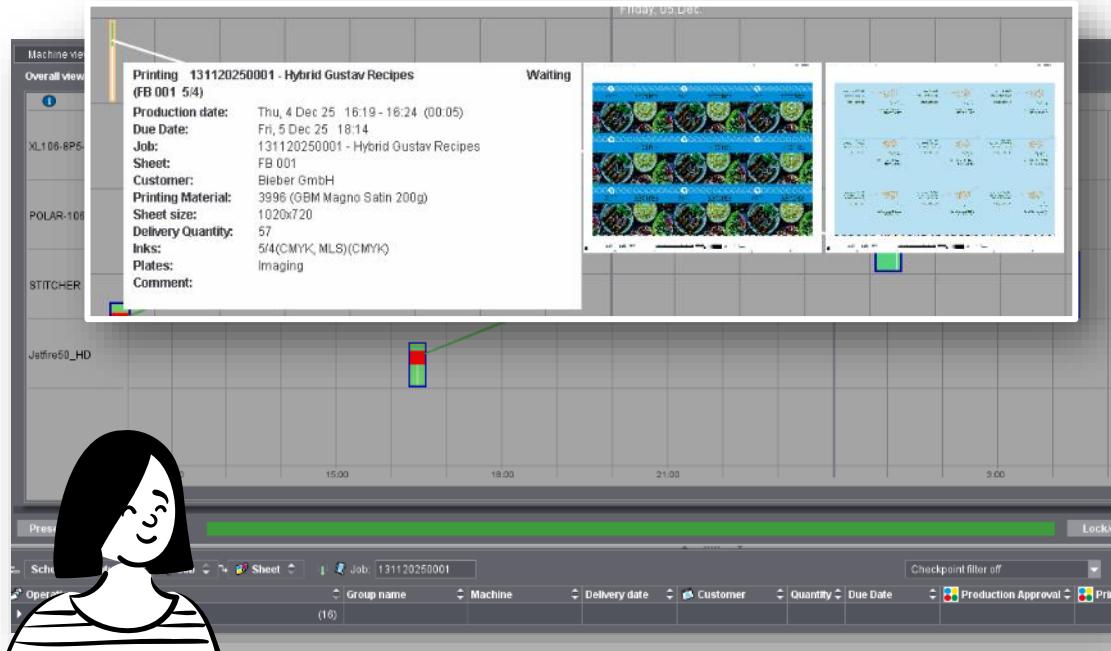

Prinect Solution

- Dynamic Product Templates for flexible imposition
- Automatic adjustment to pages total (& within Smart Automation also to format and substrate)
- Benefits: Less clicks, more production security, faster workflow

Production Planning | Hybrid Production Digital – Offset

Everything on schedule: Rachel combines Digital and Offset. Hybride Production Planning.

Situation:

- Different requirements for digital print and offset litho
- Parallel planning leads to significant coordination effort
- Risk: Double work & lack of transparency

Prinect Solution:

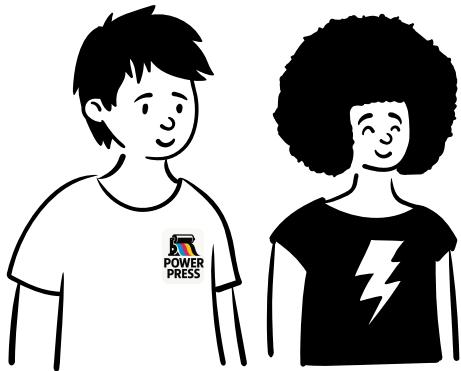

- Hybride Planning with ONE Workflow
- Automatic allocation of jobs from Digital and/or Offset
- Planning Assistant helps with planning process
- More flexibility, less re-scheduling, clear overview

Repeat Orders | Copy, Take over, Template

Efficient Repeat Orders: So that Alice & Paul can take off directly.

Copy, Take over, Template.

Flexible for any requirement
Saves time and reduces errors

Situation

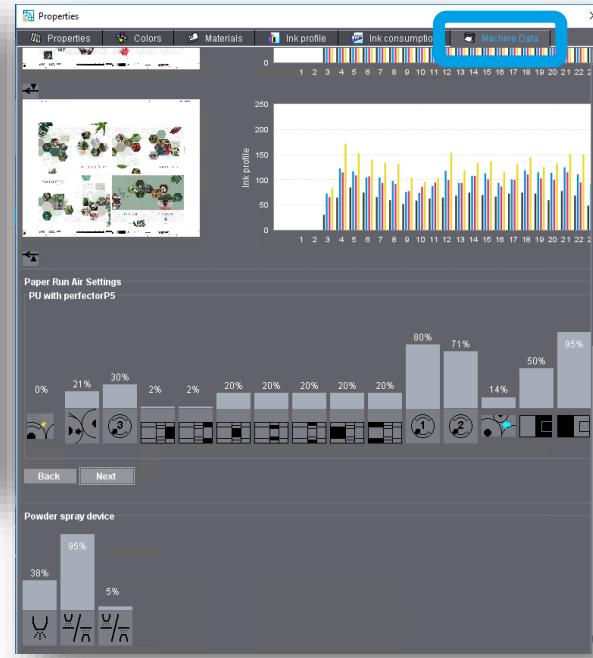

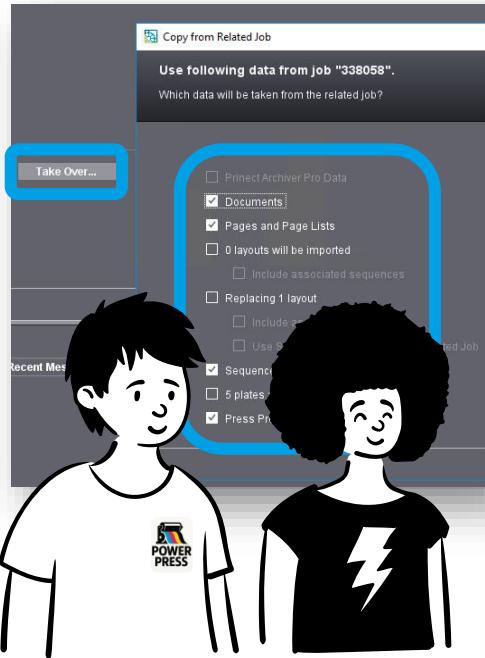

- Repeat orders are a daily routine
- Different requirements: From Reprint to *Teilnutzung*
- Challenge: Which methode is the right one?

Prinect Solution

- Copy: 1:1 copy of the root-job AND Job-JDF
- Specific use of data from the root-job
 - Job from Template incl. Take Over:
Copy of Job-JDF with specific use of selected job data
 - Take Over: New job with with specific use of selected job data

Efficient Repeat Orders: So that Alice & Paul can take off directly.

Take over for a 1:1 repeat job.

Prinect Solution

- Create a new job
 - > scalable take over from related job within the menu *Job Properties*.
- Take over of press data for transfer to Speedmaster.
- Automated via RelatedJobID from MIS/JDF & after JDF Import settings.

Benefits

- Handover of a 1:1 repeat job incl. press data for faster make ready.

Stay on Top | Job Filter by Order Status

Ben & Rachel stay on top: Filter for Jobs, Status tracking.

Job Filter by Order Status.

Situation

- Production Planning & Customer Service Rep. require transparency and overview.
- Keep track of the deadlines/delivery dates, quick response to internal inquiries
- Risk: Loss of time due to tedious clarification

Prinect Solution

- Jobfilter within Cockpit shows current job status
- Overview and direct access from your desk
- Fast decision making, no need to walk on-site for gathering information
